This listing of claims will replace all prior versions, and listing, of claims in the application:

Listing of the Claims:

- 1. (original) A hard-surface cleaning composition for removing cooked-, baked-, or burnt-on food soil from cookware and tableware, the composition comprising a soil swelling agent and a thickening system comprising synthetic smectite type clay thickening agent having an average platelet size of less than about 100 nm.
- 2. (currently amended) A The composition according to claim 1, wherein the thickening system further comprises a mixture of a synthetic smectite type clay thickening agent having an average platelet size of less than about 100 nm and a natural gum.
- 3. (canceled) A composition according to claim 1 comprising an organic solvent system including at least one solvent component acting as soil swelling agent.
- 4. (currently amended) A hard-surface cleaning composition for removing cooked-, baked-, or burnt-on food soil from cookware and tableware, the composition comprising an organic solvent system and a synthetic smectite type clay thickening agent having an average platelet size of less than about 100 nm, wherein the organic solvent system comprises at least one solvent component acting as a soil swelling agent.
- 5. (currently amended) A The composition according to claim 1, wherein the composition, when sprayed on a vertical stainless steel surface, has a flow velocity less than about 1 cm/s.
- 6. (currently amended) A The composition according to claim 1 having shear thinning properties.
- 7. (currently amended) A The composition according to claim 1, wherein the composition has having a viscosity greater than about 1 Pa s at 6 rpm, lower than about 2 Pa s at 30 rpm, and lower than about 1 Pa s at 60 rpm, measured with a Brookfield cylinder viscometer (model LVDII) using 10 ml sample, a spindle S-31.

 \mathcal{A}'

9116-711

- 8. (currently amended) A The composition according to claim 1, wherein the composition has a pH, as measured in a 10% solution in distilled water, from about 11 to about 14.
- 9. (original) A hard-surface cleaning composition for removing cooked-, baked-, or burnt-on food soil from cookware and tableware, the composition comprising a soil swelling agent and a shear-thinning thickening system whereby the composition has a viscosity greater than about 1 Pa s at 6 rpm, lower than about 2 Pa s at 30 rpm, and lower than about 1 Pa s at 60 rpm, measured with a Brookfield cylinder viscometer (model LVDII) using 10 ml sample, a spindle S-31; and wherein the composition, when sprayed on a vertical stainless steel surface, has a flow velocity less than about 1 cm/s.
- 10. (currently amended) A The composition according to claim 1, wherein the composition has a reserve alkalinity of less than about 5.
- 11. (currently amended) A The composition according to claim 1, wherein the composition <u>further</u> comprises from about 0.05 to about 10% of surfactant selected from the group consisting of anionic surfactants, amphoteric surfactants, zwitterionic surfactants, non-ionic surfactants, semi-polar surfactants, and mixtures thereof.
- 12. (currently amended) A The composition according to claim 1, wherein the composition displays an advancing contact angle on a polymerized grease-coated glass substrate at 25°C of less than about 20°.
- 13. (currently amended) A The composition according to claim 1 wherein the composition has a soil swelling index of at least about 100%.
- 14. (currently amended) A <u>The</u> composition according to claim 1 <u>further</u> comprising a spreading auxiliary selected from the group consisting of organic <u>solvents</u> <u>solvents</u> <u>components</u>, wetting agents, and mixtures thereof.
- 15. (currently amended) A The composition according to claim 14, wherein the

9116-711

spreading auxiliary has a liquid surface tension of less than about 30 mN/m.

- 16. (currently amended) A <u>The</u> composition according to claim 14, wherein the spreading auxiliary comprises one or more organic solvent components selected from the group consisting of alcoholic solvents, glycols, glycol derivatives, and mixtures thereof.
- 17. (currently amended) A The composition according to claim 14, wherein the spreading auxiliary comprises a mixture of a fully water-miscible organic solvent and a coupling organic solvent having limited miscibility in water and wherein the ratio of water-miscible organic solvent to coupling organic solvent is in the range from about 4:1 to about 1:20.
- 18. (currently amended) A The composition according to claim 14, wherein the spreading auxiliary comprises a wetting agent having a liquid surface tension of less than about 30 mN/m.
- 19. (currently amended) A The composition according to claim 14, wherein the spreading auxiliary comprises an amine oxide wetting agent.
- 20. (currently amended) A <u>The</u> composition according to claim 1, wherein the soil swelling agent is an organoamine solvent selected from the group consisting of alkanolamines, alkylamines, alkylamines, and mixtures thereof.
- 21. (currently amended) A The composition according to claim 1, wherein the composition has a polymerized grease removal index of at least 25%.
- 22. (currently amended) A The composition according to claim 4 4, wherein the composition comprises an organic solvent system is selected from the group consisting of alcohols, amines, esters, glycol ethers, glycols, terpenes, and mixtures thereof, including at least one organoamine solvent component.
- 23. (currently amended) A The composition according to claim 22, wherein the organic solvent system is selected from the group consisting of organoamine solvents, inclusive of

Cont's

alkanolamines, alkylamines, alkyleneamines and mixtures thereof; alcoholic solvents, inclusive of aromatic, aliphatic (preferably C_4 - C_{10}) and cycloaliphatic alcohols and mixtures thereof; glycols and glycol derivatives, inclusive of C_2 - C_3 (poly)alkylene glycols, glycol ethers, glycol esters and mixtures thereof; and mixtures selected from organoamine solvents, alcoholic solvents, glycols and glycol derivatives.

- 24. (currently amended) A The composition according to claim 22, wherein the organic solvent comprises organoamine (especially alkanolamine, more especially 2 aminoalkanol) solvent and glycol ether solvent, and wherein the glycol ether solvent is selected from the group consisting of ethylene glycol monobutyl ether, diethylene glycol monobutyl ether, ethylene glycol monoethyl ether, diethylene glycol monoethyl ether, diethylene glycol monobutyl ether, and mixtures thereof.
- 25. (currently amended) A The composition according to claim 22, wherein the glycol ether is a mixture of diethylene glycol monobutyl ether and propylene glycol butyl ether.
- 26. (currently amended) A The composition according to claim 22, wherein the organic solvent system has a volatile organic content about 1 mm Hg of less than about 50%.
- 27. (currently amended) A The composition according to claim 22, wherein the organic solvent system is essentially free of solvent components having a boiling point below about 150°C, flash point below about 50°C, or vapor pressure above about 1 mm Hg.
- 28. (currently amended) A The composition according to claim 1, wherein the composition is in the form of a dishwashing pretreatment composition.
- 29. (currently amended) A The composition according to claim 1 additionally comprising a salt having a divalent cation.
- 30. (withdrawn) Non-elected claim. A method of removing cooked-, baked- or burnton soils from cookware and tableware comprising treating the cookware/tableware with a

5

9116-711

hard surface cleaning composition according to claim 1.

- 31. (withdrawn) Non-elected claim. A method of removing cooked-, baked- or burnton polymerized grease soils from metallic cookware and tableware comprising treating the cookware/tableware with a hard surface cleaning composition according to claim 1.
- 32. (withdrawn) Non-elected claim. A method of removing cooked-, baked- or burnton carbohydrate soils from metallic cookware and tableware comprising treating the cookware/tableware with a hard surface cleaning composition according to claim 1.
- 33. (withdrawn) Non-elected claim. A method according to claim 30 comprising the step of pre-treating the cookware/tableware with the hard surface cleaning composition prior to manual or automatic dishwashing.
- 34. (withdrawn) Non-elected claim. A method according to claim 30 comprising the step of pre-treating the cookware/tableware with the hard surface cleaning composition and covering the pre-treated cookware/tableware with the hard surface cleaning composition and covering the pre-treated cookware/tableware with cling film for a time sufficient to promote swelling of the soil prior to manual or automatic dishwashing.
- 35. (withdrawn) Non-elected claim. A method of removing cooked-, baked- or burnt-on soils form cookware and tableware comprising pretreating the soiled cookware/tableware with a shear-thinning hard surface cleaning composition comprising a soil swelling agent and thereafter washing the cookware/tableware in an automatic dishwashing machine.
- 36. (currently amended) A hard surface cleaning product comprising the hard surface cleaning composition of claim 1 and a spray dispenser therefore, and wherein the spray droplets from the spray dispenser have an average equivalent geometric diameter from about 3 μm to about 10 μm, as measured using a TSI Aerosizer.
- 37. (new) The composition according to claim 1, wherein the thickening system further comprises a viscoelastic, thixotropic thickening agent.
